## **DETAILED ACTION**

### ***Notice to Applicant***

1. This communication is in response to the amendment filed on 8/4/06. Claims 1-30 are pending.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Examiner maintains that claims 1-30 are rejected under 35 USC 103(a) as being unpatentable under Lapsker (4,971,362) in view of Illiff (5,935,060) for the same reasons given in the previous Office Action.

(A) As the claims have not been amended, Applicant's arguments with respect to the aforementioned rejection are addressed below in the section entitled "Response to Argument."

***Response to Arguments***

4. Applicant's arguments filed 8/4/06 have been fully considered but they are not persuasive. Applicant's arguments will be addressed herein below in the order in which they appear in the Amendment filed 8/4/06.

(A) Applicant argues that the Lapser and Illiff patents, whether considered together or apart, do not make Applicant's claims 1-30 obvious. Examiner respectfully disagrees.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). Applicant argues that neither the Lapsker patent nor the Illiff patent teaches the claimed invention. However, Examiner's rejection was based on unpatentability under 103(a) under Lapsker *in view of* Illiff.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Lapsker does not

expressly teach placing on the prescription sheet an address for an Internet web site.

However this feature is well known in the art as evidenced by Iliff. Iliff teaches using the Internet to obtain medical advice for a patient (Iliff; Abstract). The motivation to combine this Internet feature to the Lapsker method is found in Lapsker. Lapsker teaches personalizing a prescription form for use by a physician (Lapsker; Col. 4, lines 30-34).

Applicant argues there would be no motivation to use the computerized medical diagnosis system of Iliff to arrive at the diagnosis if the physician has arrived at the diagnosis. However, Iliff teaches a medical diagnostic system controlled by the *patient*. Thus, even if the physician has arrived at the diagnosis, the patient could still use the system and Internet to confirm a diagnosis.

Applicant further argues that there would be no motivation to attach a prescription medication feature as shown in Lapsker to a patient driven computerized diagnosis system of Iliff. However it is there is a motivation to add the Iliff feature of using the Internet to get information about an ailment to the prescription pad feature of Lapsker. Examiner notes that these are the features that are described in the claim language.

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
